Nombre, memoria y CPUs/vCPUs

The screenshot shows the Sunstone web interface for instantiating a VM template. The browser address bar shows `opennebula.egibide.org`. The page title is "Sunstone". The breadcrumb navigation is "Plantillas > VM Templates > Instantiate VM Template". The main heading is "Instantiate VM Template #429 Debian 12 - 20251019". The interface has two steps: "1 Configuration" and "2 Advanced options". The "Configuration" step is active. The "Information" section contains a "VM name" field with the value "debian-pruebas" and a "Number of instances" dropdown set to "1". There are two toggle switches: "Start VM on hold state" and "Instantiate as persistent", both currently turned off. The "Capacidad" section shows a cost of "0.000000 COST/HOUR". The "Ownership" section has two buttons: "Instantiate as different User" and "Instantiate as different Group". The "Memoria" field is set to "1" GB. The "Physical CPU" field is set to "0,5". The "Virtual CPU" field is empty. The "VM Group" section is empty. The footer shows "Made with ❤️ by OpenNebula 7.0.1" and a "Not Officially Supported" warning.

Finalizar e instanciar la máquina

The screenshot shows the Sunstone web interface for OpenNebula. The browser address bar displays `opennebula.egibide.org`. The user is logged in as `widemos`. The main section is titled "VMs" and includes a toolbar with buttons for `+ Crear`, `Resume`, `VM state`, `VM actions`, `Create App`, and view toggles for `Card View` and `List View`. A search bar labeled "Buscar..." and filters for `Etiqueta`, `Filtrar`, and `Sort` are also present. The VM list table shows the following data:

	ID	Name	Host	IP	Owner	Group	Labels
☐	10231	debian-pruebas		172.20.228.241 +1 More	widemos	oneadmin	
☐	10230	Debian 12 - 20251019-10230	localhost		daw-99	daw-99	
☐	10229	ctf-sub-2	localhost	172.20.230.21 +1 More	ctf	ctf	
☐	10228	ctf-sub-1	localhost	172.20.230.11 +1 More	ctf	ctf	
☐	10227	ctf-team-1	localhost	172.20.230.10 +1 More	ctf	ctf	
☐	10226	ctf-team-2	localhost	172.20.230.20 +1 More	ctf	ctf	

A blue notification banner at the bottom right states: "VM Template instantiated x1 - #429 Debian 12 - 20251019". The footer includes the text "Made with ❤️ by OpenNebula 7.0.1 Not Officially Supported".
